Manulife

Connect Cambodian Customer to Award-Winning Multi-Cancer Screening in Singapore

Access to Guardant Health's Multi-Cancer Detection (MCD) test as part of Manulife's longevity focus*

Manulife

Why?

- Cancer is often detected at later stages in Cambodia, when treatment options are more limited and costly.
- Every day, around **50 Cambodians** hear the life-changing words: “YOU HAVE CANCER”, and roughly **38 people** lose their lives **to cancer**.
- Financial uncertainty should never be the reason to delay treatment.

Therefore, the MCD Test* by Guardant Health truly matters.

The Multi-Cancer Detection (MCD) test offers a proactive approach, enabling earlier detection across 10 types of cancer through a simple blood draw.

This solution can significantly improve the chances of timely intervention and better health outcomes, while reducing financial burden and giving families greater confidence to plan ahead.

Manulife is committed to helping people **live longer, healthier lives** - empowering customers to take control of their health before symptoms appear.

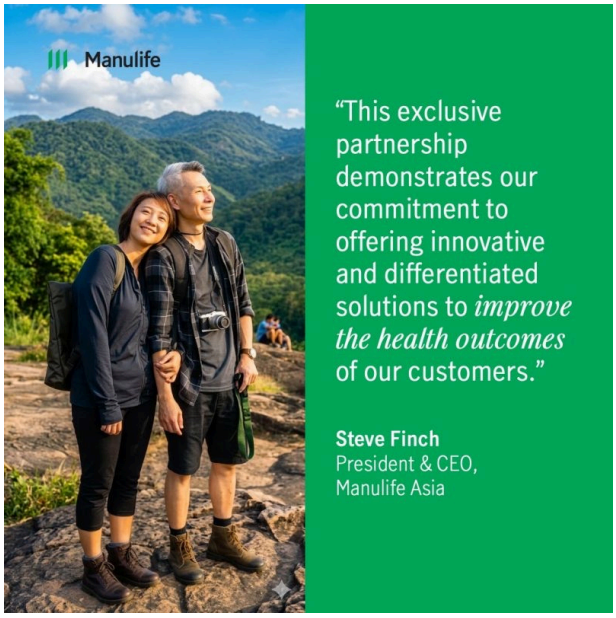
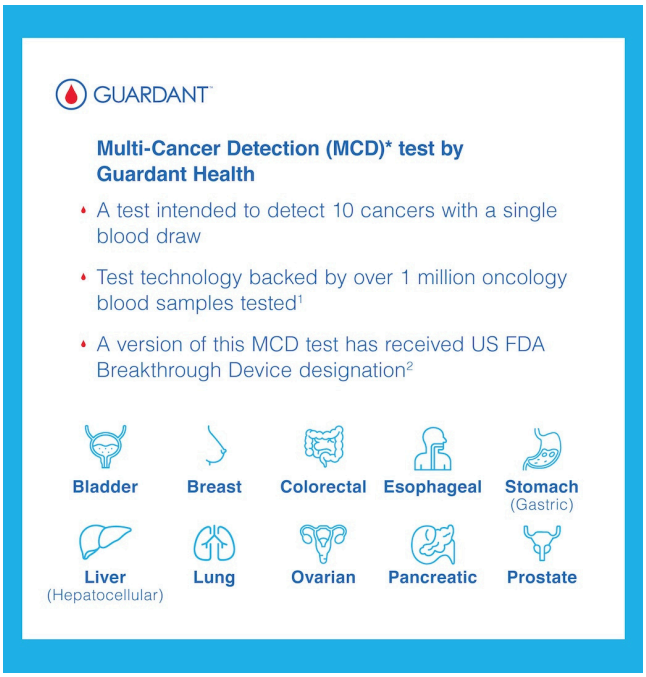
Manulife

Exclusive Partnership between Manulife & Guardant Health

The partnership with Guardant Health, a global leader in blood-based cancer testing with over a decade of experience[1], is part of Manulife's focus on longevity.

This exclusive partnership introduces the Guardant Health MCD test* to Asia for the first time - empowering customers with earlier cancer detection capabilities.





The Guardant Health MCD Test* is intended to detect **10 cancers** – bladder, breast, colorectal, esophageal, stomach, liver, lung, ovarian, pancreatic and prostrate cancer through a single blood draw.

The MCD Test* by Guardant Health is:

- **Scientifically proven**, with technology backed by over 1 million oncology blood samples tested[1]
- **Innovative -** Guardant Health's MCD test has received U.S. FDA Breakthrough Device designation[2]
